

**UNIVERSIDADE FEDERAL DE ...NOME DA UNIVERSIDADE... INTERNACIONAL  
STUDENT EXCHANGE PROGRAM**

MONTH, YEAR

## **LETTER OF INTENT**

To whom it may concern,

My name is NOME DO APLICANTE, I am a Brazilian undergraduate student of NOME DO CURSO at the Federal University of NOME DA UNIVERSIDADE. I am writing this letter to inform you of my interest in the International Student Exchange Program at NOME DA UNIVERSIDADE QUE ESTA APLICANDO.

To explain why I want this opportunity to study at FUTURA UNIVERSIDADE in Canada I need to explain a little about myself. Ever since I was a child, despite the adversities lived by my family I had the wish of making the difference and leaving my mark in the world. As I grew up, I became a curious kid, wondering how things worked and fell in love with science, especially how it could improve or even save lives. Then, when I was 16 years old I came across Biomedical Sciences, a course that was a perfect fit for me and could give me a chance to follow and know more about the areas of study I am interested on, such as molecular biology, virology, microbiology and immunology. I believe that studying some of those areas at NOME DA FUTURA UNIVERSIDADE, a university with high academic standards, would be an outstanding experience an a huge step to help me make the difference and leave the mark I wanted to leave on the world when I was a child.

Another decisive point about my interest in the International Student Exchange Program at NOME DA FUTURA UNIVERSIDADE is my educational record along undergraduate period. Along undergraduate period, I have already been a scientific initiation volunteer for about a year and a half in the Virology Laboratory at the NOME DA UNIVERSIDADE, where I learned and got to know more about academic research, also having the opportunity to present laboratory projects at scientific events. Nevertheless, in my spare time, I am a member of a few other projects, such as the League of Infectious Diseases and Tropical Medicine, where the students have a chance to discuss topics about these fields. I have also been a member for two years of the Camillo Golgi Academic Center of the Biomedical Sciences School, holding scientific and social events for the Course academic community at the University, such as the Biomedical Sciences Academic Journey event, where I had an enormous opportunity, as one of the organizers, for learning,

maturing and growing. Therefore, when I learned of the announcement of the exchange program for Canada in my university I knew it was another opportunity to learn more about science, in a different country and culture in one of the best universities in the world to study, and maybe bring some of the knowledge exchanged in the program to the projects I am involved with in Brazil.

I believe that having this kind of international experience and getting to enjoy the Canadian Educational System is an unique opportunity for personal and professional growth. I will give my best to enjoy everything that NOME DA FUTURA UNIVERSIDADE has to offer me, especially in the areas of study I am interested in, and I also hope to leave a positive mark behind and maybe inspire other people to live this kind of fulfilling experience.

Best regards,

NOME DO APLICANTE.
